

L.H. Comfort Seat Strap Attachment Techniques for A-1, A-2

Thank you for purchasing the Long Haul Comfort Seat.

For those of you who want to attach the L.H. Comfort Seat directly onto your keel, you will need the following items:

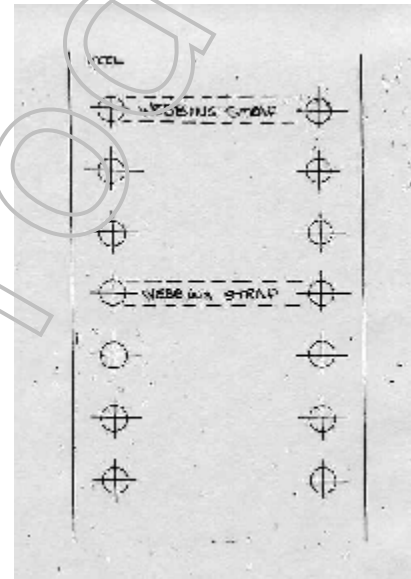

- (2) Keelboard Seat Straps (sent from L.H. Folding Kayaks)! this will allow for (1) seat
- (1) 1/2" Flat Drill bit

Instructions:

1. The 1/2" holes will be drilled 4.5" apart from one another, from center to center.
2. You will need to use the 1/2" Flat drill bit and begin drilling on one side, only thru 1-2 layers of laminate, DO NOT DRILL COMPLETELY THRU. (as you may split the wood).
3. Turn keel over and then drill the remaining part of the 1/2" hole.
4. You will need to varnish with marine grade varnish, where you have just drilled. This will keep water from getting into the center of the wood where you have just drilled.
5. Once the varnish has been applied 2-3 times and is dry, you will now attach the webbing straps.
6. You may find that you will want to drill more holes to give you more adjustment possibilities.

Please note drawing on right. Drawing to right is NOT drawn to scale.

Please call Long Haul Folding Kayaks for more questions that you may have regarding this way of attachment.

For those of you who want to attach the L.H. Comfort Seat directly onto your keel (Only if I-beam style) using the Seat Plate, you will need the following items:

- (2) Keelboard Seat Plates (w/ seat straps attached)! this will allow for (1) seat.
- (1) 7/16" drill bit.
- (4) 7/8", # 6 phil oval or flat screws

Instructions: While frame is **NOT** in the hull, drill 7/16" holes into seat hold down plate and keel. Make sure not to drill too far down into the keel.

Placement:

(Aerius II) Place L.H. Plate forward from center of Keelboard with wooden tung (13.5" w/ front edge of plate), If second one added for 2nd paddler place behind center of keel w/ metal horseshoe (28" w/ front edge of seat).

(Aerius I) Place L.H. Plate 3-1/2" from the Klepper seat tung to front edge of L.H. plate.
